Logistics Metrics Analysis Reporting System /
Customer Wait Time (LMARS / CWT)

Anomaly Codes

The Anomaly Code list and report is also a tool to aid in determination of suspect data and performance reporting. The Anomaly Code list is available at www.dla.mil/i-6/dlms/eLibrary/Documents/PMPRC/Anomaly_Code_List.docx

** Reference DLM 4000.25, Volume 6, Chapter 4, C4.6.3.1.2

C4.6.4.6. Handling of Components and DLA Transaction Services review the initial runs of each month's reports, to include analyzing and researching unusual trends. Significant changes need to be researched using the drill down capability to determine the cause. Researchers should look for conditions such as one or more activities performing mass close outs of open aged records in a non-timely manner resulting in unusually long LRT. The Anomaly Code list and report is also a tool to aid in determination of suspect data and performance reporting.
